**IMMUNE
HEALTH SUPPORT**

with Beta (1,3)/(1,6) Glucan

Formulated to provide
immune support to cats

WHAT IS IMUQUIN™ CAT?

Imuquin™ is a unique blend of ingredients that function to support the immune health of kittens and adult cats 6 weeks of age and older. These ingredients include beta-glucan, marine lipids, and a mix of vitamins and minerals.

• Beta (1,3)/(1,6) Glucan

- Extracted from the cell wall of brewer's yeast
- Supports normal immune system function
- Maintains innate defenses and cell- and antibody-mediated response

• Marine lipids

- Supplemental source of omega-3 fatty acids, including EPA and DHA
- DHA is important for normal development of the eyes and nervous system
- Help maintain organ and tissue functions, including immune function and a healthy inflammatory response

• Vitamins and minerals

- Adequate intakes of vitamins and minerals are required for the immune system to function efficiently
- Support normal cellular activity
- Maintain and support the structure and function of immune cells

WHY IS IMMUNE HEALTH SUPPORT IMPORTANT FOR CATS?

A well-functioning immune system is crucial to kittens and cats for staying healthy. Functional immunity requires a complex interaction of organs, cells, and molecules working together as the cat's defense against a challenging environment.

HOW DOES IMUQUIN™ CAT PROVIDE IMMUNE SYSTEM SUPPORT?

The blend of ingredients in Imuquin™ Cat is specially formulated to provide immune support. Beta-glucan helps maintain a normal immune system, preparing it for possible challenges from bacteria, viruses, fungi, and parasites. Omega-3 fatty acids help support normal development of vision and the nervous system, and maintain organ and tissue functions. Several vitamins and minerals help the immune system function effectively.

IS MY KITTEN OR CAT AT RISK?

Concern for normal immune system function is warranted for cats in many situations. Stress suppresses the immune system and cats of all ages may experience stress from a number of causes such as travel, adding a new cat or kitten to the household, & aging. In many stressful circumstances remaining healthy may be challenging.

HOW WOULD I KNOW THAT AN IMMUNE SUPPORT PRODUCT IS EFFECTIVE?

Effectiveness of an immune support product is largely measured by normal growth and continued good health. This is the principle of quality health care.

WOULD MY CAT BENEFIT FROM IMMUNE HEALTH SUPPORT?

Throughout a cat's life there may be numerous opportunities for the immune system to function sub optimally. Sometimes cats need help to manage through these challenges.

We would encourage you to **ask your veterinarian**, who will discuss specific concerns and immune system issues and make appropriate recommendations for your cat's individual situation.
