

IT ONLY TAKES

1 BITE

from an infected mosquito
to spread heartworm
disease to a dog.¹

of owners of
heartworm-positive
dogs say their dogs
were on a 12-month
heartworm disease
prevention regimen.³

of dog owners say they
sometimes accidentally
miss or skip doses.⁴

Treatment

Prevention

Heartworm treatment
can cost 15 times more than
a year's worth of prevention.¹

IT ONLY TAKES

1 DOSE

to protect your dog from
heartworm disease for

6 MONTHS

Give dogs the **ONLY** heartworm disease protection
that lasts for 6 uninterrupted months.
